

# Information about recycling materials

Important! Make sure to obtain as representative a sample and photo as possible of the material.

1. What is this material made of? Is it a homogeneous fraction, or is it a mixed fraction? If mixed, what types of materials are included in the mixture?

2. Degree of contamination, if any, and to what extent?

3. What is the original form/purpose of the material?

4. Is there a data sheet/test available for the material? If yes, please attach the data sheet and omit page 3. If not, please fill out page 3 with technical information.

5. Estimated annual tonnage?

6. Is the material seasonal?

- Yes, only relevant during the summer months
- Yes, only relevant during the winter months
- No

7. Color of the material? Is it solid-colored or painted?

- Not relevant

## Information about storage and pickup

8. How is the material packaged upon arrival? (Big bags, maxi containers, octabins, pallet frames/crates, etc.)?

9. How much can be stored at the customer's site?

10. Does the customer have specific preferences regarding how often we should take the material?

11. Does the customer deliver the material to us, or do we need to collect the material?

12. Do you have any expectations regarding the weight we can carry on a vehicle?

13. Do you have any other relevant information about the material?

14. In what form is the material now? (Loose, shredded, baled, ground, etc.)?

15. Price expectation from the customer, if you have this information.

## Technical information

16. Trade name?

17. Extrusion or injection molding product?

- Extrusion product
- Injection molding product
- I don't know
- Not relevant

18. MFI/MFR (Melting Index), if applicable?

19. Density, if applicable?

20. Fillers, if applicable?

Important! Make sure to obtain as representative a sample and photo as possible of the material.
